Personal Summary

Aspiring Gameplay Programmer skilled in Unity (C#) and Unreal Engine, with a strong foundation in game mechanics, debugging, and AI programming. Experienced in developing and optimising gameplay systems, collaborating in small development teams, and using version control (Git, GitKraken). Passionate about creating engaging player experiences and continuously learning new technologies.

Skills

Languages: C, C++, Python **Game Engines:** Unity, Unreal Engine **Version Control:** Git, GitHub, GitKraken
Soft Skills: Teamwork, Problem-Solving, Communication **Other Tools:** Microsoft 365, Blender, Adobe Photoshop, Maya

Experience

Volunteer Teaching Assistant College of North East London (Games Design and Development) (2022 - 2023)

- Taught students Unity and C# programming, debugging, and optimising game code.
- Assisted in game design and programming lessons, covering mechanics, level design, and scripting.
- Provided guidance on troubleshooting errors and improving code efficiency.

Information Technology Service Desk Analyst Greenwich University (October 2024 - Present)

- Maintained accurate documentation of IT incidents and resolutions in service management systems.
- Provided technical support to students and staff, diagnosing and resolving software/hardware issues to minimise downtime.
- Provided technical support and troubleshooting for IT systems, improving issue resolution efficiency.
- Collaborated with cross-functional teams to enhance IT infrastructure and support operations.

Projects

Coco's Treat Dash

milkobop.itch.io/cocos-treat-dash

- Developed core gameplay mechanics using Unity (C#) (player movement, treat collection, level progression).
- Implemented animations, sound effects, and responsive controls to improve engagement. progression, ensuring a smooth and engaging player experience.
- Collaborated in a team of 3 using Trello and GitKraken for task management and version control.
- Conducted play-testing and iterated on feedback, refining game mechanics, balancing difficulty, and improving overall game performance.
- Showcased at the Digital Shark Expo of Greenwich University.

Education
